

## **TRIBUTE TO GARY CRAIG**

Where would I be without EFT? Sitting in my office with a full caseload of "traditional" therapy clients --- I can't even imagine that anymore! I was originally sent to EFT by colleagues who had completed the extensive Thought Field Therapy training (TFT) that I did in 1996-1997 with Fred Gallo. I was thrilled with the simplicity of EFT, and the successes my clients had in my office or when I taught them to try it on themselves was undeniable.

EFT made it so much easier for me to introduce "energy psychology" to my clients and groups who were in desperate need of help. I love how the results are often life-changing for clients, I don't think I'll ever tire of the surprise and delight when results show up. There's nothing like that look on a client's face when he or she says "What just happened?" or "What did you just do?" Of course I didn't "do" anything but introduce them to an exceptional healing modality that allows them to be empowered and to access their OWN healing abilities. (Of course I had many personal successes as well such as changing my life and health by clearing my own long-term insomnia!)

Many thanks and SO much gratitude to Gary for introducing us all to EFT, for being a pioneer and leader in those early days of Energy Psychology and for encouraging us and giving us ways to spread the word about EFT around the world. He is to be congratulated for his tremendous success of approaching his goal of getting EFT in every household! I wish Gary a very peaceful and healthy retirement and success (no doubt) in his new endeavors. He certainly deserves it!

With love,  
Carol Look, EFT Master
