

TRIBUTE TO GARY CRAIG

Now then boys and girls, if you are sitting comfortably then I'll begin.

Once upon a time... well no not really 'a time' more like 'all time'. In a land far away.... well no, not a land, or a place more like everywhere. So, lets start again... always upon all time everywhere, consciousness which is all that is and is not of everything witnessed a singularity that manifested as a moment of earth time in a place called California. A singular moment of earth time that changed all subsequent earth time. Collective consciousness incarnate upon the blue planet had evolved in its time through mysticism, religion, more religion, science and more science. The planet was divided like the brain organs of the incarnate souls upon it into right and left or east and west hemispheres. The material and spiritual were divided in thought and in action. And then, at the perfect moment, a human who bridged spirit and matter, science and faith, reached out and downloaded an idea a tiny chunk of something and nothing. Seeming coincidence and heartfelt skill in communication led him from one connection to another. The idea took clearer form and shape with words and process easily accessible, simple and quick. That incarnate soul known in that time as Gary spread the idea far and wide with generosity, skill, love and clarity. And the idea blossomed and spread around the blue planet with magnificence, clarity and communion. Humans locked in dis-ease and seriousness began to laugh and share a common process. In earth speak the idea "spread like topsy" and was freely given with a culture of openness and delight. And as that delight and enthusiasm grew, many, many earth beings made demands on the soul known as Gary and called on him from the opposite side of the blue planet in the middle of his night interrupting his soul on its journeys. He worked and he struggled and he worked and he struggled and he tried and tried to keep all happy and maintain the purity of the idea that he had come to regard as his. All this effort shadowed the delight in him. Until, always upon all time everywhere consciousness which is all of everything witnessed a singularity that manifested as a moment of earth time in a place called California on a time called 15th December 2009.

Love to all from the earth being called Gwyneth
